

## WOODEN PALLET REPAIR SYSTEM

**Cengar Saw and Pallet Spreader in use**

### CENGAR PL905

Air Saw was developed specifically for use by the Wooden Pallet Repair Industry many years ago.

It is light, easy and comfortable to use, safe, produces low vibration and noise and uses only 4 CFM at 6 Bar so it can be run off a small air compressor.

Use it with a Pallet Spreader or similar device to separate the boards and it will provide many years of reliable use with low maintenance cost and high productivity.

### Pallet Spreader

manufactured for use in a demanding working environment, light and easy to use. Ideal for Euro Pallets.

Space Height 90mm

Can be used safely at any air pressure between

4 and 8 Bar Power at 6 Bar 1900N

Type	Stroke	Air Consumption	Weight
	mm	CFM	Kgs
Saw PL905	22	4.0	2.4
Pallet Spreader	42	--	2.7

### Cengar Pallet Blades

are made from high quality European Steel. They will bend but not break even if used at a 90° angle

For those customers which have a need to use Electric Saws for some applications we supply our high quality Electric Pallet Blades in two versions as follows :-

ME200/24

ME225

Type	Length	Width	Thickness	Tpi
	mm	mm	mm	
MC220/24	220	12	0.9	2.4

Type	Length	Width	Thickness	Tpi
	mm	mm	mm	
ME200/24	200	19	1.25	8/12
ME225	225	19	0.9	10/10

These have a standard end and will fit all makes of Electric Saw.

Cengar manufacture a range of hand and Clamp mounted Air Saws suitable for cutting all kinds of metal, GRP and Composite Materials from thin sheet to heavy sections.

To see video clips of our Saws in use please look at our website [www.cengar.com](http://www.cengar.com)

**Reduce your production costs in a safe working environment**
